New Services

Relax for your IUI or IVF Procedures

We now offer in-house psychological support services.

Come in and treat yourself to a relaxation session in our new spa-like relaxing suite. We have reclining sofas, warm candlelight, and audio meditations/visualizations for you to enjoy during your fertility treatment.

Learn valuable relaxation tools beforehand to optimize your experience of the insemination, embryo transfer, or other fertility procedure. Once you learn the tools, you can apply them anywhere and at anytime.

Office hours: [Monday-Thursday 9am-12pm](#)

Please ask to speak to Leila, our in-house counselor, for a brief and free consultation prior to your customized relaxation session. Find out about the benefits of mindfulness on your journey to parenthood.

Leila Fazeli-Tabrizchi is our Mental Health Counselor with a Master of Science degree from Johns Hopkins University. Leila is a member of the ASRM's mental health professional group.

Leila's email is: fcpservice@yahoo.com

Photo Contest

We love to see how your little ones have grown!

Submit a photo of your baby for a chance to win a \$100 gift card!

To submit, log onto: fertilitycentermd.com/photo-contest.html or email fccontest@gmail.com

Winner will be selected September 15, 2017.

Dr. Santiago Padilla established the Fertility Center of Maryland 25 years ago!

On July 1, 1992, Dr. Padilla and four dedicated staff members opened the doors to The Fertility Center of Maryland. Marta Padilla and Kim Blair have been with us since the beginning and Dr. Katherine Bass joined us in 1996 as we've grown our successful practice.

Growing Families with Advanced Personal Care has been our goal since the beginning and we are proud to say it became our reality with over 10,000 babies born from our treatments!

Freezing your eggs

The decision as to the best time to have a baby is a very personal one.

More and more women are choosing to delay childbearing for many reasons: to complete their education, early career goals, travel or not having met the right partner. Certain cancer treatments, like chemotherapy or radiation can temporarily or permanently affect your eggs and cause infertility or sterility. Unfortunately, age can affect your chance of getting pregnant. Recent advances in egg freezing (vitrification) offer a choice to protect and preserve future fertility. As part of your decisions, you may elect to freeze your eggs.

PRESERVE FUTURE FERTILITY

SERVING OUR VETERANS PROGRAM

Our center has joined the American Society of Reproductive Medicine in this program under which participating clinics like ours are offering treatment discounts to veterans whose service-related injuries have impaired their fertility and who do not have insurance coverage for their fertility treatment. For more information please call us. The discount does not apply to insurance deductibles, **co-pays** and **out-of-pocket expenses**.

Patient Stories

My husband and I started trying to have a family in 2010. After a year and half of no success we came to the Fertility Center for help. We initially tried 3 rounds of IUI but again had no success. We then began IVF. Unfortunately the first 2 rounds of IVF treatment didn't work. However, as the saying goes... **Third time is the charm.**

Due to the help from the amazing staff at the Fertility Center, my husband and I welcomed a baby boy named Anderson into our lives...

Thank you again to everyone at the Fertility Center.

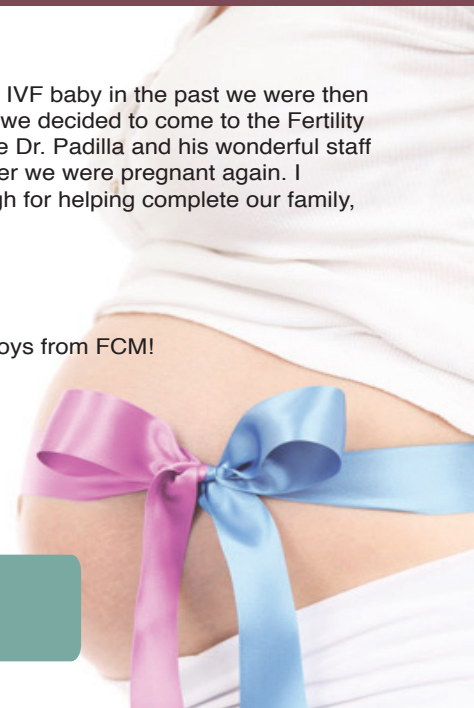

- LAUREL AND JESSE

After having a successful IVF baby in the past we were then unsuccessful. Thankfully we decided to come to the Fertility Center of Maryland where Dr. Padilla and his wonderful staff welcomed us. Months later we were pregnant again. I cannot thank them enough for helping complete our family, we are forever grateful.

- JESSICA M.

Successful with 2 baby boys from FCM!
